

Precast Concrete Skirting

This Precast Concrete Skirting is an excellent safety barrier for your steel buildings. The Precast Concrete Skirting protects your building from forklifts, trucks, and the ever changing environment. Manway doors can be added for access.

The 8 ft x 30 ft panels are available in a broomed finish or textured in finishes such as split face block or traditional brick. Engineering is available, upon request, for the design of your specific building needs. Please contact our office for pricing and availability.
